Features of Motor Handpiece

Speed : 1,000~50,000 min<sup>-1</sup>

Speed is steplessly variable from 1,000~50,000 min<sup>-1</sup>. Smooth and powerful torque is delivered at both high and low speeds. The extremely high maximum speed of 50,000 min<sup>-1</sup> allows high precision micro-machining.

2 Types of Motors

Very high torque from compact motors.

			NAKANISHI Smart Switch Color
• Compact Type	(ENK-500C)	140W	Blue
• Torque Type	(ENK-500T)	200W	Gray

NAKANISHI Smart Switch

The switch provides a click sensation and a confirmation tone is produced by the Controller when the switch is operated. The motor type is distinguishable by the switch color.

Excellent Durability

High performance brushless motor eliminates the need to change carbon brushes. NAKANISHI's internal load test has proven continuous use for more than 5,000 hours.

High Precision

NAKANISHI's ultra-precision technology ensures bur concentricity of 0.02 mm or less, which allows for very high precision finishing.

Simple Screw on Attachments

Special Dust-Proof Mechanism

Then handpiece has a patented built-in-dust protection system to prevent the infiltration of dust and debris into the front bearings. This NAKANISHI patented design assures long-term durability.

Micro Grinder & Handpiece Stand

This specially designed micromotor stand allows easy pick-up and set-down of the micro-grinder. Strong, but soft to the touch, the micro-grinder stand contains convenient, integrated storage compartments for adjustment spanners and a spare chuck.

9 Types of Attachments Available

9 different types of attachments making an almost infinite number of applications possible.

Portable Controller with Carrying Handle

Very convenient to be carried.

Features of Controller

Optimal Control via Microcomputer

The operation of all Esper 500 functions is controlled by a high performance microcomputer (CPU) that is programmed with NAKANISHI's proprietary technology. NAKANISHI's CPU has direct control of the brushless micro-grinder allowing smooth and highly precise cutting and polishing of a wide variety of materials. Bur "chatter" has been eliminated. The system automatically senses which micromotor is attached (ENK-500C or ENK-500T) and self adjusts to provide optimum micro-grinder performance.

Auto Cruise Function

The controller is equipped with an auto cruise function that operates the micro-grinder at a preset speed without the need to use the foot pedal. This function eliminates foot fatigue during prolonged operation.

Simplified Hand and Foot Pedal Control

You no longer need to push a switch on the controller to switch between hand and foot pedal control. If you want to operate the motor handpiece by hand simply push the NAKANISHI Smart Switch, if you want to use foot pedal control simply depress the foot pedal.

Memory Speed Function FiXspeed®

An exclusive new feature of the Esper 500 system, the FiXspeed® system allows the user to independently preset the speed of motor A and motor B. For example motor A can be set to maintain the speed set by the FiXspeed® system while motor B has variable control using a foot pedal. This function allows for unprecedented flexibility.

Eco-Friendly Design

The electronic circuits are designed using NAKANISHI's proprietary technology to meet eco-friendly expectations by minimizing power consumption. Since power demands are minimal, no significant heat is generated and no cooling fan is required.

Error Code Display Function

Detects trouble and failures occurring within the motor or unit and displays them as one of seven types of error codes (E0-E6). This reassuring function permits the user to correct the problem. Possible errors are overload, open circuit, motor lock, controller overheat, etc.

Other Features

- Self Check Function (Maintenance Mode)
- Smooth Operation • Operation Check Sound
- Highly Visible and easy to operate front panel
- 2-Digit Digital Display
- A/B 2 Motors Can Be Connected (Simultaneous motor operation is not allowable)

Precautions for using Nakanishi Tools

For safe use of the tools

- Please read operation manuals before using any tools.
- Please keep all operation manuals on hand for reference whenever necessary.

**Caution** Incorrect use of the tools, or ignoring ‘CAUTIONS for safety’ described in the operating manuals, could cause fatal or serious bodily injury.

CAUTIONS

**Always use safety glasses, mask, face guard for your safety.**

**Do not touch the tools when in operation.**  
Make sure the work area is neat and there is sufficient light.

**Do not use the tool where flammable liquids or gases exist.**

**Do not leave operating tools.**  
Confirm that the tool has stopped completely after switching off.

**Select proper tools and products for your application.**  
Select tools carefully considering the performance of the tools, work procedure and type/shape of the material.

**Fix the work material firmly in a vise and/or other clamping fixture.**

**Do not wear loose clothing and/or accessories that may be caught in machinery.**  
Long hair should be secured prior to machine operation.

**Check all tools carefully before use.**  
Clean the inside of the collet and tool shank, chips or fine metals inside the collet could cause tool slippage and result in damage to machinery or bodily injury.

**The tools should be used by taking care of the overhang and below maximum allowable speed.**  
The catalogue shows the maximum allowable speed at 13 mm overhang (distance between the face of the collet and the top of the tool shank).

**Fasten the collet firmly.**  
Make sure the tool is fully installed in the collet to avoid tool slippage.

**Do not use damaged or broken electric cords and air hoses.**

**Start at low speed and increase gradually to insure safe work.**  
This is particularly important for the use of new tools, large cutting tools and elastic tools such as rubber grindstone, sander and brush tools.

**Keep the tools and products in a cool, dry place.**

**Check the tools carefully before use.**  
Confirm that the tools are free of chips, cracks, splits, scratches, irregular bondings, and out of round shanks, etc.

**Stop grinding or polishing immediately whenever unusual sounds, vibrations, or wear are found.**  
Restart the work only after the problem is found and corrected.

**Only use attachments, parts, consumable articles and accessories produced by NAKANISHI.**

**Do not apply high pressure to or pry with the tools.**  
This can break and/or bend the tools. Use the tools within their design limitation. Excessive pressure will decrease the efficiency of your work and cause excessive wear of the tools.
